

DDGPT

Investment Committee Memorandum

Generated: July 12, 2026

Risk Score: 0.22

Confidential institutional diligence report generated using DDGPT autonomous diligence workflows.

Risk Findings

YELLOW

UNDER TARGET PERFORMANCE

Detail: Net IRR below target IRR

Evidence: Net IRR=16.8% | Target IRR=18.0%

Why It Matters: Fund may be underperforming stated underwriting targets.

Question to Ask: What is driving the performance shortfall?

Extracted Metrics

Document	Net IRR	Target IRR	TVPI	Mgmt Fee	Carry
test_packet.pdf	16.8	18.0	1.62	2.0	20.0

Investment Committee Memo

1. Top 3 Risks

Based on the provided flags, the top risk is:

1. Underperformance Relative to Targets
 - Severity: YELLOW
 - Detail: Net IRR (16.8%) is below the target IRR (18.0%).
 - Why It Matters: The fund may be underperforming its stated underwriting targets, raising questions about the ability to meet investor expectations.
 - Question to Ask: What is driving the performance shortfall?

There are no additional flags provided, so no further risks can be identified beyond the one listed above.

2. Inconsistencies

No inconsistencies were identified in the extracted data or flags.

3. Recommendation

APPROVE (confidence 0.66)

4. Justification

The recommendation to APPROVE is based on the following evidence:

1. Strong AUM and TVPI:

- Assets Under Management (AUM) are \$1.25B with high confidence (0.775) and full agreement (1.0).
- TVPI is 1.62x, indicating positive returns relative to capital invested.

2. Aligned Fee Structure:

- Management fee is 2.0% on committed capital, with a revised 2.25% structure for new commitments in 2026.
- Carry is 20% over an 8% preferred return, which aligns with industry standards.

3. Single Flag with Moderate Severity:

- The only flag is a YELLOW severity for underperformance relative to targets. While this warrants attention, it does not outweigh the positive metrics and overall confidence in the fund's performance.

Given the deterministic rules engine's recommendation and the supporting evidence, the investment is approved with a confidence level of 0.66.
